Heinz Bruhl, Agent
Mycorp Services, Inc.
P. O. Box 4141
Park City, Utah 84060

Dear Mr. Bruhl:

Re: Notice of Intention to Commence Small Mining Operations, Mycorp Services Mine, S/029/002, Morgan County, Utah

Thank you for your Notice of Intention to Commence Small Mining Operations received by the Division on June 24, 1992. The application for the proposed Mycorp Services Mine, located in the SE/4 of the NE/4 of Section 20, T1N, R3E, SLBM, is complete and no additional information is required at this time.

The activities described by your Notice of Intention to Conduct Exploration are essentially the same activities described in the small mining notice and in the same location. The notices were therefore combined and the project listed as a small mining operation only. This will give your operation an on-going status rather than a one-time project.

For your reference, I have enclosed copies of our summarized rules regarding "Operation and Reclamation Practices", and the statutory penalty for failure to reclaim a minesite (enclosures SMO-1 and SMO-2).

Please give special consideration to item #10 of the "Operation and Reclamation Practices" (SMO-1). Stockpiling topsoil material prior to beginning your mining operation will help ensure successful revegetation efforts upon final reclamation of the minesite. If the area being mined is a solid rock outcrop, or if the land surface is very rocky, then soil stockpiling is probably not possible. However, even the first few inches of undeveloped material is worth saving to aid in later revegetation efforts, and future regulatory release from reclamation requirements.

Should you wish to expand your operation beyond the five (5) acre limitation, please notify this office as soon as possible to discuss the necessary permitting requirements.

A Memorandum of Understanding (MOU) between this Division and the State Department of Environmental Quality (DEQ) requires us to notify them upon receipt of a mining application. If you haven't already done so, you are advised to contact their office prior to starting your small mining operation to determine whether additional permits and/or approvals are required. We will forward a copy of this letter and your small mining notice to the DEQ for their review. Their address and phone number is: Department of Environmental Quality, 288 North 1460 West, Salt Lake City, Utah 84116, (801) 538-6121.

Thank you for your cooperation. When in the area, a member of the Division staff will examine the site. If you have any concerns regarding this letter do not hesitate to contact me. Best wishes with your mining operation.

Sincerely,

Anthony A. Gallegos
Reclamation Engineer
